Recap

- Chipyard Basics
 - Composing SoC using generators
 - Adding custom accelerators
 - Simulation
 - VLSI flow:
 - **New!:** fully open-source RTL to GDS flow
- FireSim
 - Full-system FPGA-accelerated simulation
 - Linux-based software workloads
 - Debugging and instrumentation
 - Network simulation
 - **New!:** distributed metasim support!
 - **New!:** local (on-premises) FPGA support!

Join The Community!

- Used in industry and academia
- Development is all open-source and on GitHub
 - “main” branch is active development, may be unstable
 - We recommend using tagged releases (e.g. Chipyard 1.7.0 / FireSim 1.14.0 released yesterday 😊)
- Sub-projects managed using submodules
- Hundreds of pages of documentation!
 - If something isn't clear, please let us know
- We appreciate feedback! We appreciate PRs even more!
- Thank you for attending!
